

WWW.MOW.MEDIA

Welcome

HI! I'M PETER WELTMAN

I have over a decade leading global brand strategy and communications for scaling AI companies. My work has supported $85M+ in client fundraises, secured Tier 1 media coverage, and delivered award-winning Government grants in the U.S. & Canada.

I've partnered with NVIDIA, P&G, 3M, Carta, and SoCal Edison, leading cross-functional motions across rebrands, M&A, GTM, brand identity, and website creation (design/coding).

Finally, I love sharing my knowledge and experiences as a global technology keynote speaker across the U.S. and LATAM.

AI Cancer Rebrand*

Avitia

WEBPAGE MESSAGING/POSITIONING:
WWW.AVITIA.BIO

*POST BANKRUPTCY

Problem: Emerging from bankruptcy, the company needed a new brand and a credible market reintroduction for its AI-powered cancer diagnostics platform.
Approach: I led the full brand creation and market relaunch, developing the Avitia name, complete messaging and visual identity system, and a new website from design through deployment. I also led government-facing communications, press, and social, highlighting Avitia's partnership with Mila, a world-renowned AI research institute. My scientific communications work included editing peer-reviewed research on liquid biopsy and access to precision oncology.
Result: The relaunch reintroduced Avitia with clarity and credibility, securing coverage in BetaKit and Les Affaires. In less than a year, the company expanded across Canada, as well as into Thailand and the Middle East. My research editing contributions appeared in Current Oncology and The Journal of Liquid Biopsy.

LIQUID BIOPSY CANCER TESTING IN **4 EASY STEPS**

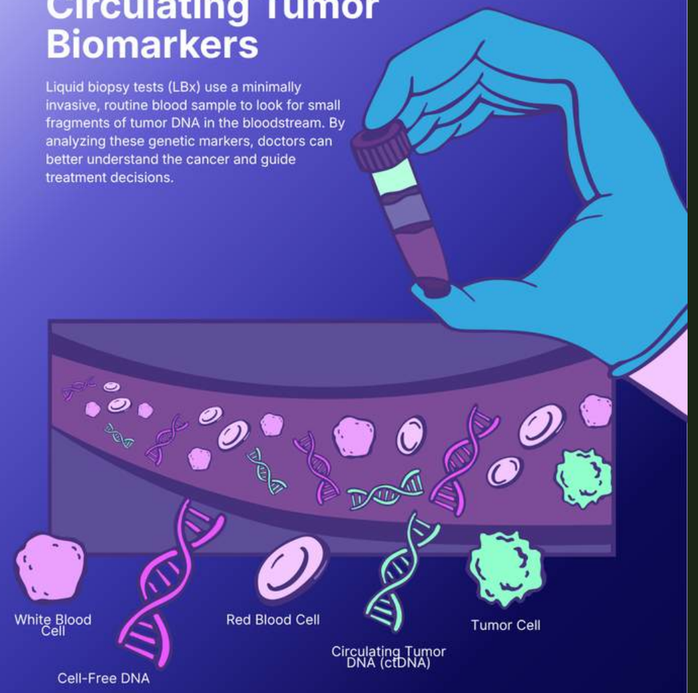

If you are already living with cancer, a minimally invasive blood sample can provide additional information about your disease. These liquid biopsy tests detect tiny fragments of cancer signals in the bloodstream, providing information that can help physicians make informed treatment decisions as part of your overall care plan.

1. **Talk to Your Doctor:** Ask your doctor about a blood test that may help guide your cancer care.
2. **Give a Small Blood Sample:** Your doctor sets up a routine blood draw at a local clinic
3. **Advanced Testing Analyzes Sample:** Under specialist supervision, sequencing technology examines blood for cancer signals.
4. **Receive Fast Results:** Your care team receives a report that can help identify treatment options and guide the next steps.

Blood Components with **Circulating Tumor Biomarkers**

Liquid biopsy tests (LBx) use a minimally invasive, routine blood sample to look for small fragments of tumor DNA in the bloodstream. By analyzing these genetic markers, doctors can better understand the cancer and guide treatment decisions.

HEALTHCARE

Grin

Tele-Orothdontic Platform

Problem: Grin needed to introduce a remote dental monitoring platform and communicate how its technology could make care more convenient while keeping trusted local doctors involved.
Approach: I led communications for the platform launch and strategic collaboration with 3M, followed by the funding announcement involving P&G, Triventures, and SpringRock Ventures. I shaped the announcements around access, convenience, and continuity of care.
Result: I secured two CNBC interviews with Grin's CEO, bringing national visibility to the platform and its relationships with 3M and P&G. The funding announcement marked $14M in total financing.

WEBPAGE MESSAGING/POSITIONING:
WWW.GET-GRIN.COM

HEALTHCARE

At Home Care Laguna Health

Problem: Laguna Health needed a clear brand and market position for a new approach to post-hospital recovery, combining data, technology, and behavioral health expertise to shorten recovery and prevent costly readmissions.
Approach: I solidified the Laguna Health name, developed the messaging and positioning, and led the go-to-market launch. I created the foundational messaging and directed the visual identity. This included the website design, creation, and messaging. I also directed the brand's explainer video. I then ran the company's launch and funding announcement.
Result: The launch introduced a unified brand alongside $6.6M in seed funding, securing coverage in CTech and Crunchbase News and establishing Laguna Health's position in post-hospital recovery.

WEBPAGE MESSAGING/POSITIONING:
WWW.LAGUNAHEALTH.COM

HEALTHCARE

AI Healthtech Merger

Problem: Imagia Cybernetics and Canexia Health needed a clear merger narrative that positioned the combined company to expand access to precision oncology.
Approach: I led the merger announcement, shaping the release narrative and communications strategy around the combined company's AI and genomics capabilities. The positioning incorporated Imagia's collaboration with Mila, a world-renowned AI research institute, connecting its research foundation to more accessible cancer testing and treatment.
Result: The announcement secured coverage in BetaKit, Healthline, and Business in Vancouver, reinforcing credibility at the intersection of AI and healthcare.

SECURITY

Generative AI Security Spinoff

Problem: AutoAlign needed to establish its identity following its spin-off from Armilla AI and explain how its Sidecar technology could make enterprise generative AI safer.

Approach: I led launch messaging and communications, including the announcement of Sidecar's integration with NVIDIA NeMo Guardrails. I wrote and edited the technical white paper explaining its AI safety architecture, translating complex research into a clear enterprise proposition. The narrative also highlighted AutoAlign's relationship with the Vector Institute, a world-renowned AI research institute.

Result: The work secured launch coverage in BetaKit and supported the NVIDIA integration announcement with a published technical white paper. NVIDIA also featured AutoAlign in its AI Foundry ecosystem, reinforcing the company's position in enterprise AI safety.

WEBPAGE MESSAGING/POSITIONING:
WWW.AUTOALIGN.AI

SECURITY + INSURANCE

AI Governance

Problem: Armilla AI needed to introduce an ML testing platform focused on eliminating bias and unintended outcomes, making a complex technical proposition clear and credible.
Approach: I led the launch messaging and communications, including close collaboration with Yoshua Bengio, and a featured podcast.
Result: The launch secured coverage in the Toronto Star and BetaKit, reinforcing Armilla's position in responsible AI. My messaging supported a successful Y Combinator W22 application.

WEBPAGE:
WWW.ARMILLA.AI

DEFINESE

FIRST 3D PRINTED PARTS ON THE MOON

Leading Additive Manufacturing

WEBPAGE:
WWW.AON3D.COM

Problem: AON3D needed to communicate its advanced manufacturing capabilities through two milestones: a Series A fundraise and a partnership to send 3D-printed parts to the moon.
Approach: I led the announcement of the company's $11.5M Series A and its partnership with Astrobotic for the Peregrine lunar mission, connecting the funding story to a tangible demonstration of its technology.
Result: The announcement secured coverage in TechCrunch and BetaKit, elevating AON3D's visibility and positioning its industrial 3D-printing technology for demanding aerospace applications.

DEFINESE

skyfront

World Record Drone Flight

Problem: Skyfront needed to translate a breakthrough in drone endurance into a clear story about the technology's potential for commercial and public safety applications.
Approach: I developed the messaging and positioning and led the announcement of the Perimeter 8's record-setting flight, connecting its technical achievement to the limitations it could overcome.
Result: The announcement brought visibility to a multirotor flight lasting 13 hours and 4 minutes over 205 miles, securing coverage in New Atlas and industry press.

WEBPAGE:
WWW.SKYFRONT.COM

AUTONOMY+ DEFENSE INFRASTRUCTURE

Autonomous Vehicle: Identity and Environment

Problem: Petra needed to introduce a new tunneling technology focused on building safer communities, with Tesla co-founder Ian Wright serving as CTO.
Approach: I led the full brand creation and launch. This included creating Petra's new name, complete messaging and visual identity system. This included project management of a scalable visual language and website.
Result: The brand supported a launch announcing $33M in total funding with top-tier VC DCVC. I led the launch, which included coverage in CNBC, Forbes, WIRED, and TechCrunch. I also secured multiple DoD U.S. Air Force Grants (>$180K USD).

CURRENT VALUATION: >$1B USD

Problem: Neara needed to launch a complex AI climate-tech platform in the U.S., aligning fragmented stakeholders in a highly regulated, PR-averse industry.
Approach: I led the U.S. market launch, shaping the narrative strategy and directing the launch video to clearly communicate the platform's capabilities and relevance.
Result: The launch coincided with $24M in funding and a strategic partnership with Southern California Edison (NYSE: EIX), earning coverage in The Wall Street Journal, Axios, and Smart Energy International.

WEBPAGE:
WWW.NEARA.COM

AI Climate Tech

Generative AI Customer Support

Problem: HiOperator needed to integrate generative AI into its messaging while elevating its CEO as a recognized thought leader.
Approach: I repositioned the company's messaging, led the website narrative, and developed executive thought leadership across earned media, speaking opportunities, and original content.
Result: The work resulted in Inc. Magazine coverage, a Hearst Labs NYC presentation, a VentureBeat byline, and VentureBeat Women in AI finalist recognition. I also launched PL-ai-N Speak, a biweekly podcast featuring CX leaders from Otter, Everlane, and beyond.

WEBPAGE MESSAGING/POSITIONING:
WWW.HIOPERATOR.COM/

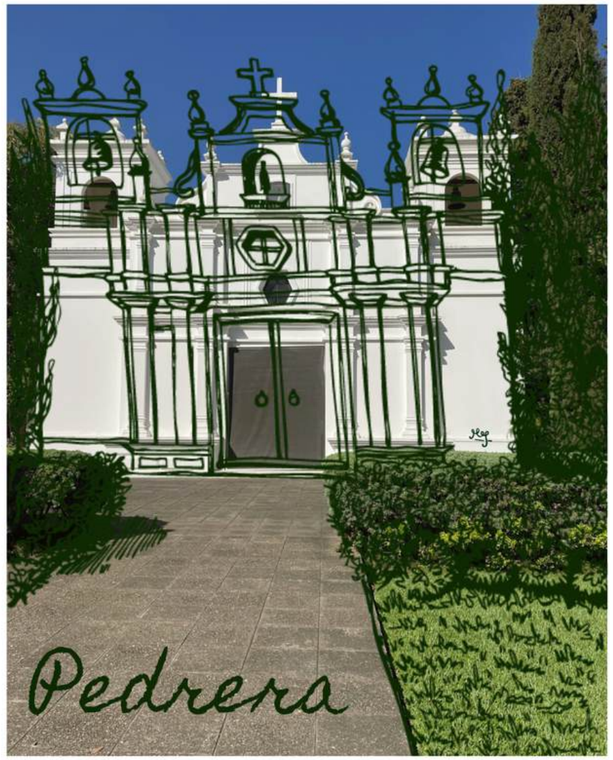

REAL ESTATE

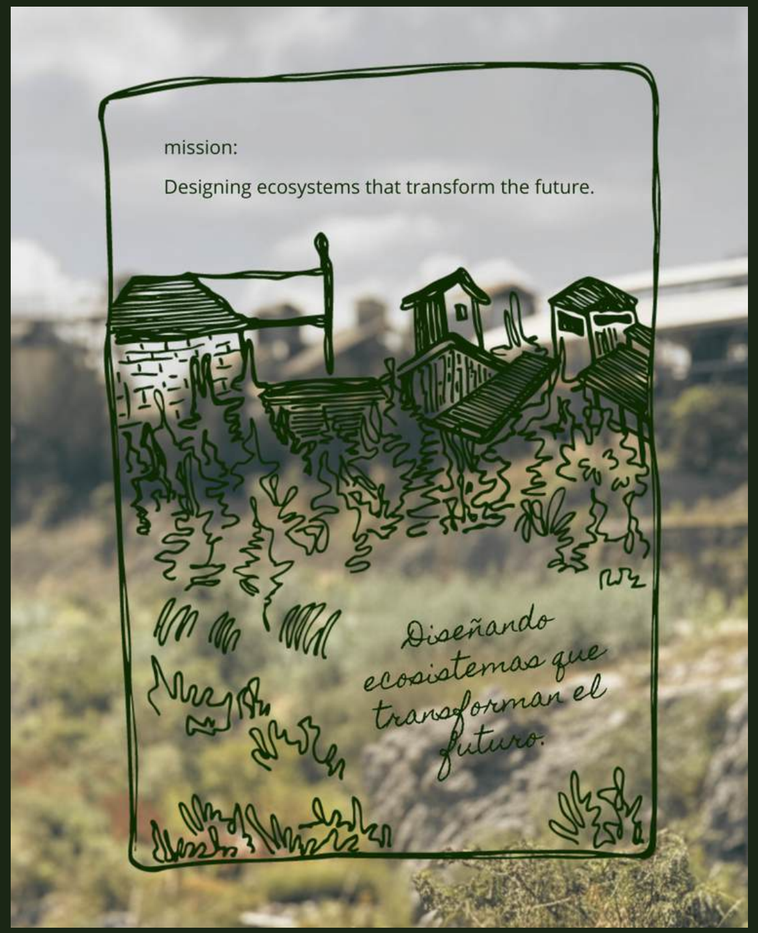

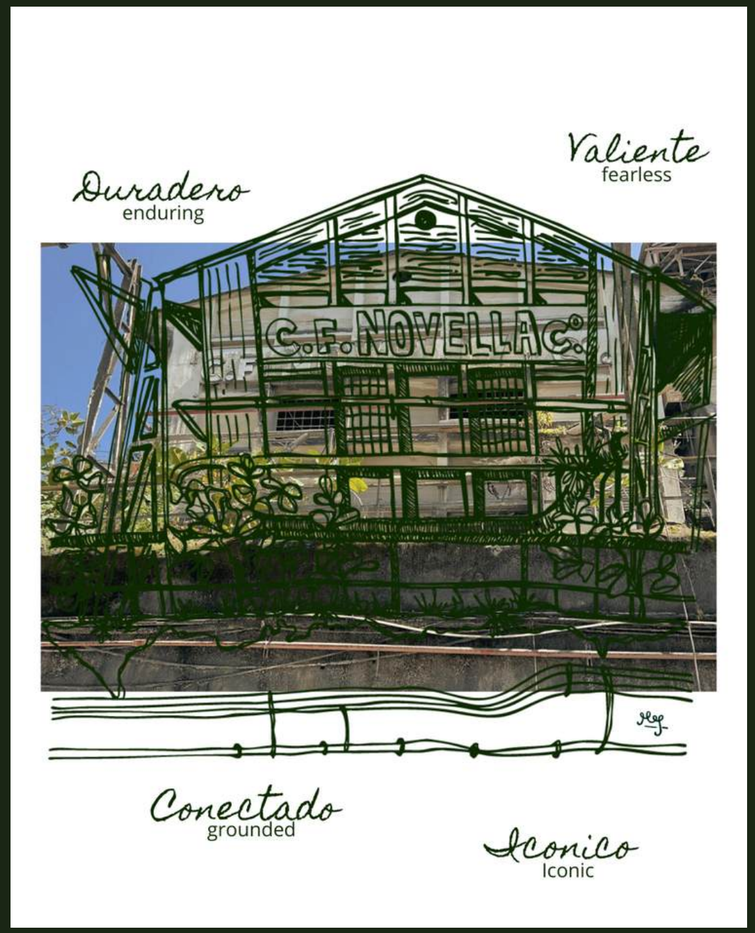

ARCHITECTING THE IDENTITY OF A $1B URBAN LANDMARK

Problem: Pedrera, a $1B+ mixed-use urban development, needed a unified brand position among government, private partners, and internal stakeholders. Competing names and narratives obscured the project's identity.
Approach: I aligned leadership around a shared vision and mission, built a unified messaging matrix, and established a clear stakeholder narrative. I also introduced brand architecture concepts to orient the project long term.
Result: I established a cohesive strategic foundation for one of Guatemala City's most ambitious urban revitalization efforts — positioning Pedrera to evolve into an iconic urban brand redefining how Guatemalans live, gather, and connect.

Redefining the way we live

ENTERTAINMENT + COMMUNITY

hey HOUSTON!

Hip Community Events Platform

Problem: A new event discovery platform needed a hip, tech-forward brand and an intuitive experience for multiple stakeholders.

Approach: I led the full brand creation and launch. I developed the Hey Houston name, complete messaging, and visual identity system. This included a scalable design framework across browser/mobile. I led the website build, designing its sophisticated, secure consumer workflows for the platform's different audiences.

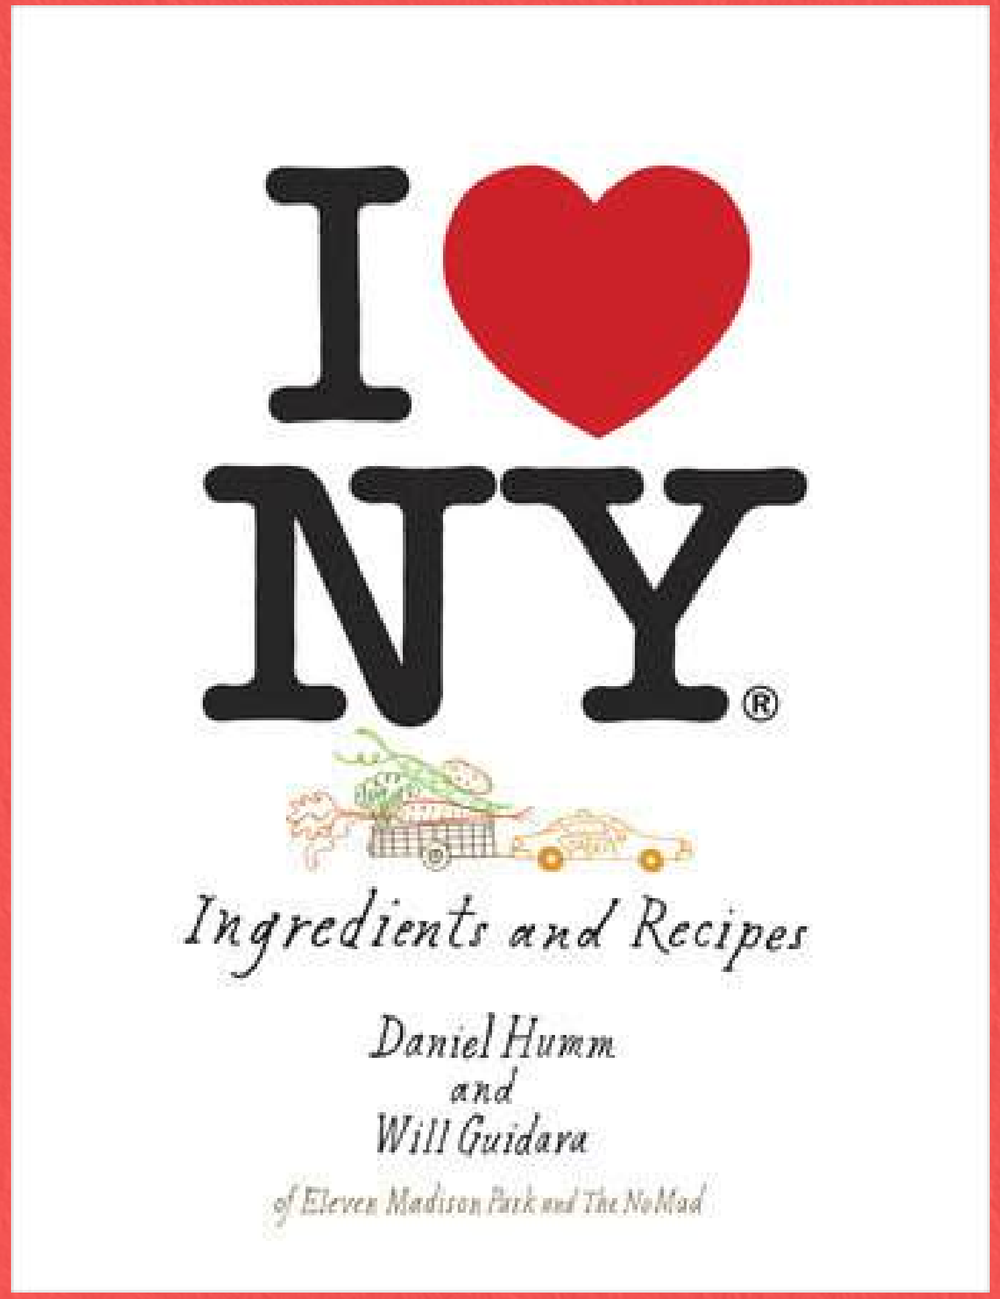

Result: The launch established a cohesive brand and digital experience, with a design framework built to grow and evolve alongside the platform.

WEBPAGE MESSAGING/POSITIONING/DESIGN:

ENTERTAINMENT + PLACEMAKING

Acclaimed Cookbook Ghostwriter

Problem: Renowned chef Daniel Humm and hospitality entrepreneur Will Guidara wanted to tell the story of New York cuisine through the people, ingredients, and traditions behind it.
Approach: They enlisted me to ghostwrite every character profile for I Love New York: Ingredients and Recipes, traveling across the tri-state area to interview farmers, ranchers, and artisans. I also collaborated with legendary designer Milton Glaser and photographer Francesco Tonelli.
Result: The book brought the region's food producers and culinary heritage to life alongside nearly 150 recipes. It earned a nomination in American Cooking at the 2014 James Beard Foundation Book Awards.

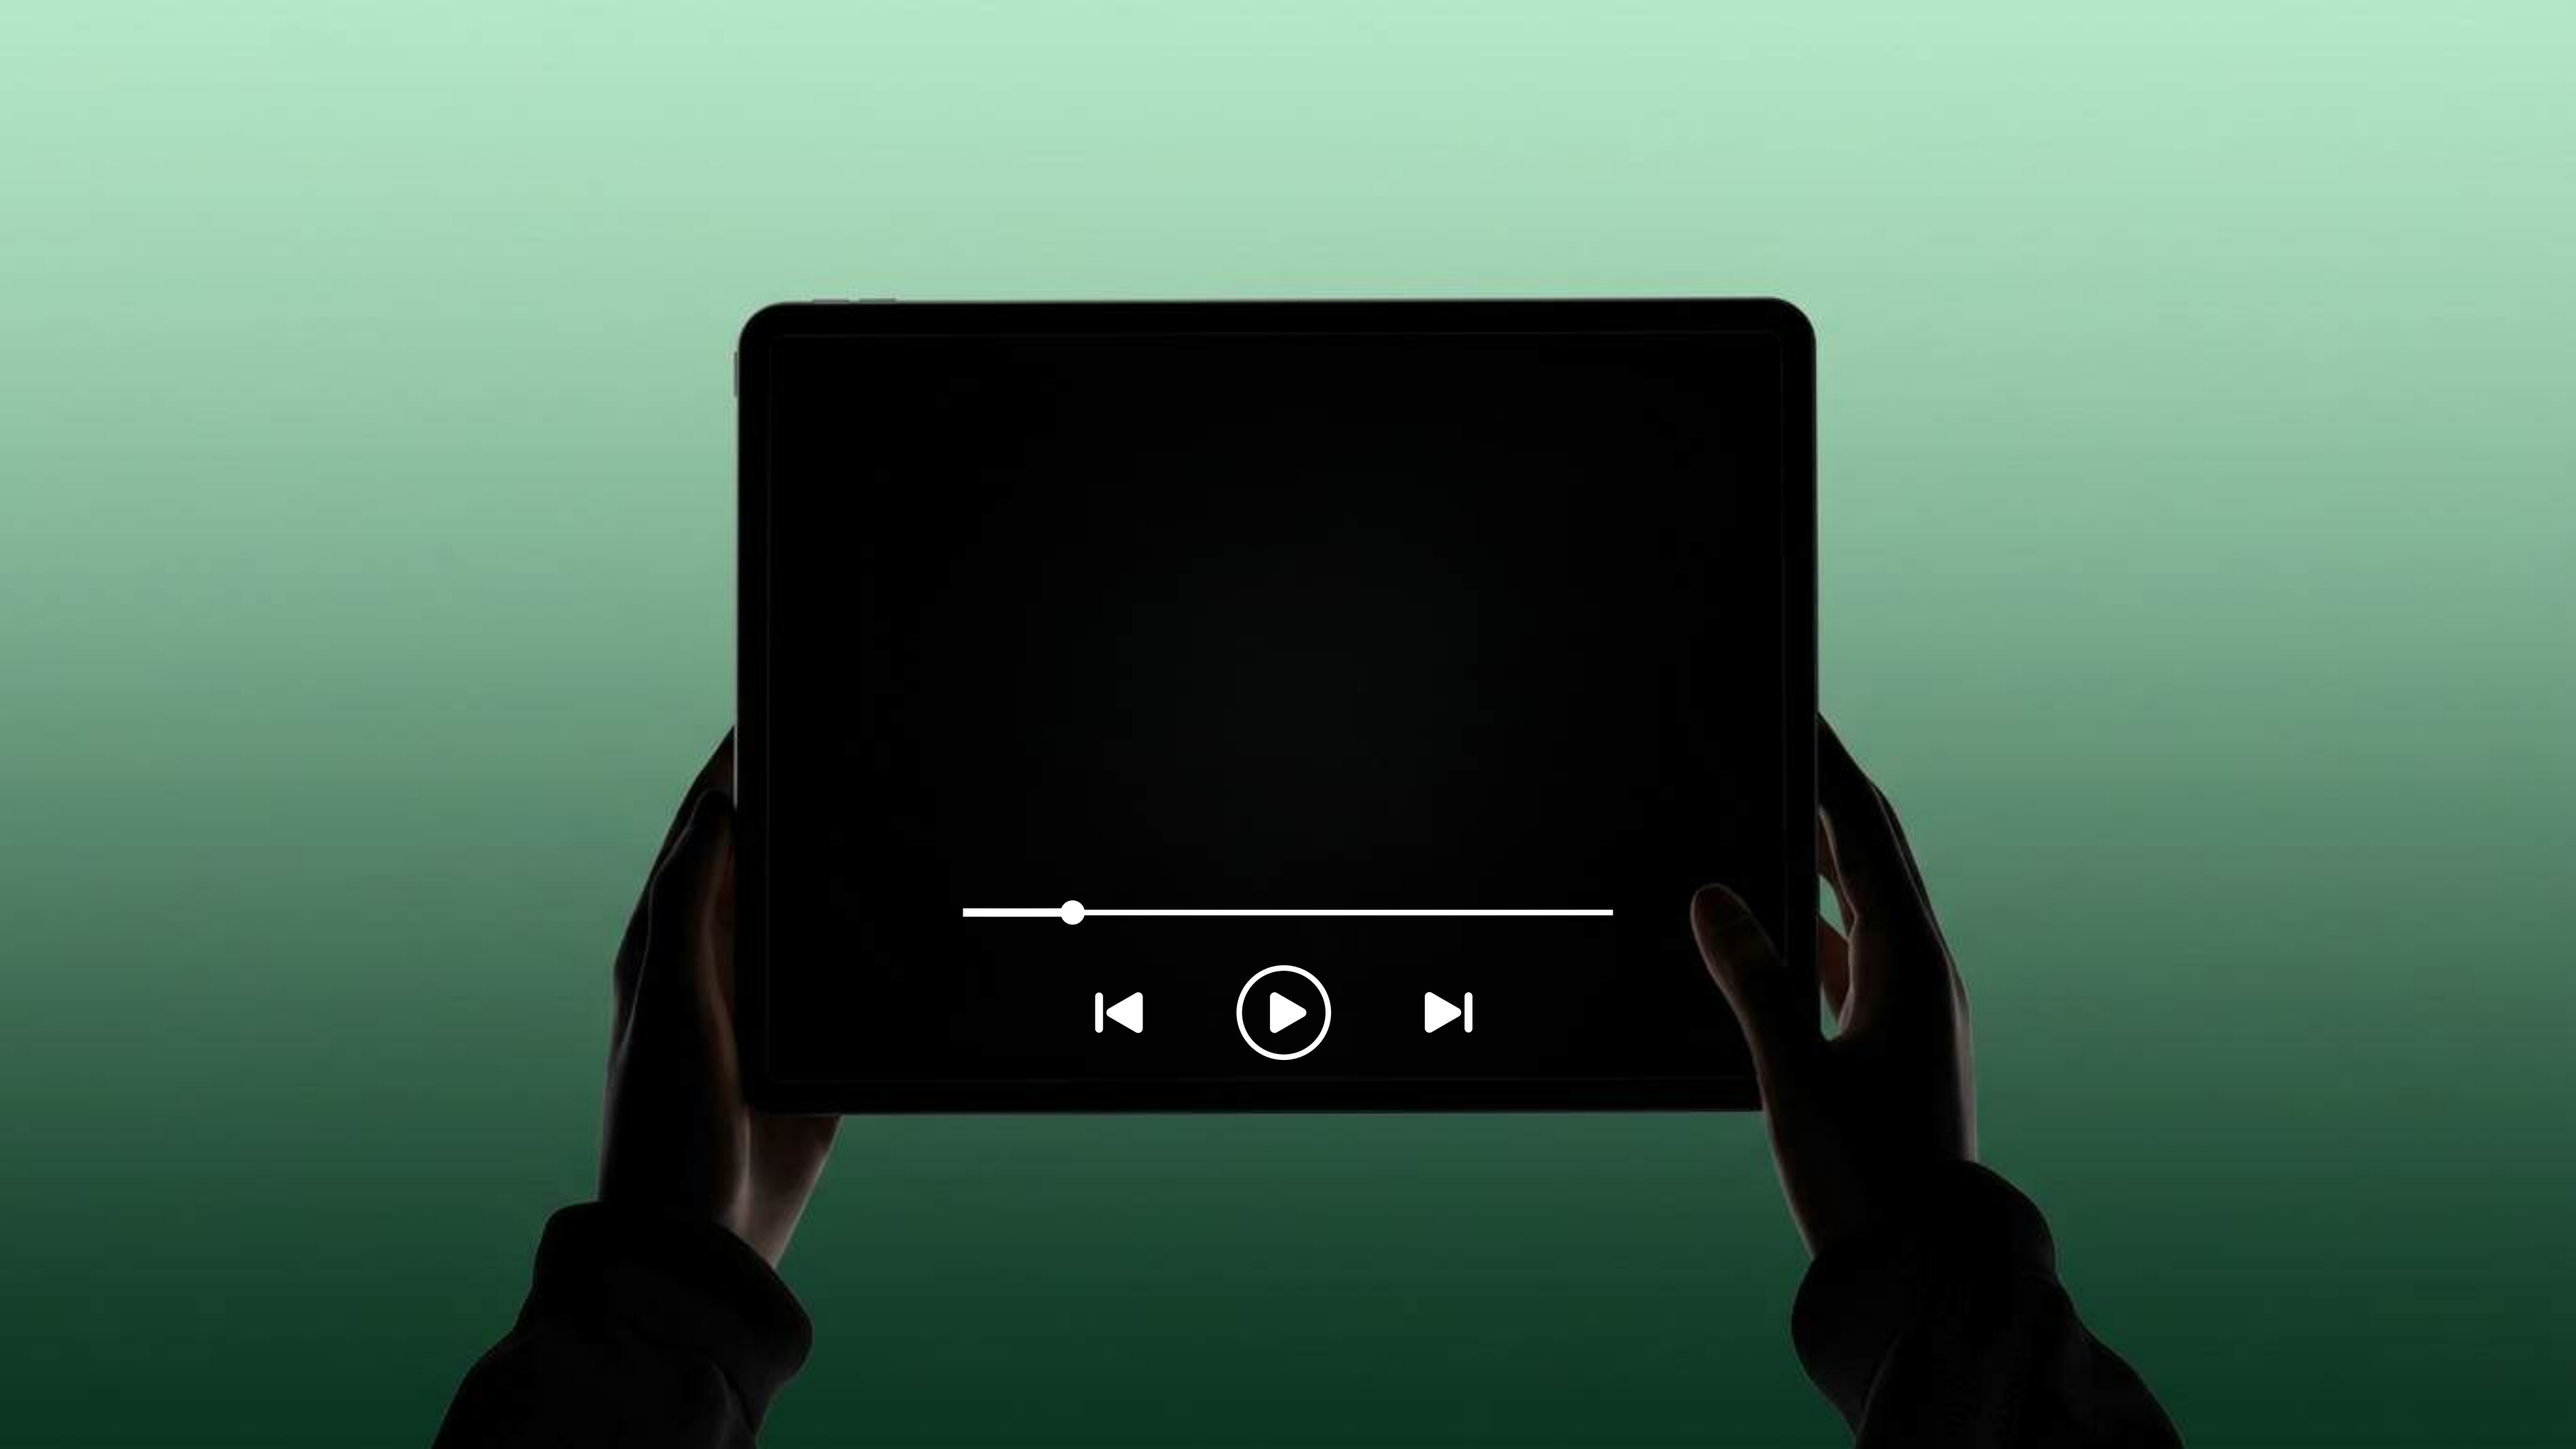

AMAZON BOOK PAGE

ENTERTAINMENT + PLACEMAKING

NYC Neighborhood: Identity and Brand

Problem: A reimagined New York City neighborhood needed a publication that honored its history and cultural legacy while expressing its emerging identity.
Approach: I created The NoMad Reservoir's name and led the periodical's creative direction across messaging, positioning, visual identity, and content.
Result: The publication gave NoMad a distinct editorial platform connecting its cultural legacy with its next chapter. Today, NoMad is one of New York City's most sought-after neighborhoods. I secured sought-after Images from Andy Warhol's estate and worked with leading NYC cultural photographer Michael Halsband.
